DETAILED ACTION

Election/Restrictions

1.   Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not

so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a

single invention to which the claims must be restricted.

Group I, claims 12-28, drawn to a mounting holder for a vibration motor.

Group II, claims 29-34, drawn to a mounting structure of a vibration motor with an

eccentric weight and a plane including said pair of attachment faces [which] intersect with a

circular orbit of the outermost point of the eccentric weight at two points.

The inventions listed as Groups I&II do not relate to a single general inventive concept

under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special

technical features for the following reasons: Group II has the special technical features of a

plane including said pair of attachment faces [which] intersect with a circular orbit of the

outermost point of the eccentric weight at two points.

2.   The election of an invention or species may be made with or without traverse. To reserve

a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated

as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the

inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

3.   Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4.   Regarding interfering claims 29-34, per MPEP 2304.01(d), to avoid delay of prosecution of non-interfering claims, the examiner suggests restriction of the application to the interfering claims, 35 U.S.C. 121 in which case the applicant may file a divisional application for the claims that do not interfere.
